Fellowships & Awards	National Bureau of Economic Research, Fellowship in Aging and Health Economics, 2019-2021 Harvard University, Merit/Term-Time Research Fellowship, 2019-2020 (<i>declined</i>) Harvard University, Certificate of Distinction in Teaching, 2018 Harvard University, Summer Predissertation Fellowship, 2017 National Institutes of Mental Health, Traineeship, 2015-2018	
Research	Harvard Medical School, Graduate Research Assistant for Professor Timothy Layton, 2017-2021 Harvard Medical School, Graduate Research Assistant for Professors Thomas McGuire, Michael McWilliams, and Timothy Layton, 2016 The Children’s Hospital of Philadelphia, PolicyLab, Research Associate, 2012-2015 The Children’s Hospital of Philadelphia, The National Children’s Study, Data Analyst, 2010-2012 The Pennsylvania State University, Undergraduate Research Assistant for Professor David Shapiro, 2008-2009	
Teaching	Harvard College, “Why is There No Cure for Health Care?” (Undergraduate Course), Teaching Fellow for Professor David Cutler, 2018 Harvard University, Core Course in Health Policy (PhD-Level Course), Teaching Fellow for Professor Joseph Newhouse, 2017-2018	
Other Employment	Greylock McKinnon Associates, Consultant, 2019 City of New Orleans, Mayor’s Office of Youth and Families, Field Project, 2019 Greylock McKinnon Associates, Graduate Summer Intern, 2017	

Job Market Paper	<p>“Immigration Enforcement, the Home Care Workforce, and Access to Long-Term Care: Evidence from Secure Communities” with Rachel M. Werner</p> <p>Most Americans will need long-term care at some point in their lifetimes, with many relying on assistance from home health and personal care aides. Since nearly one-third of these workers are foreign-born, it is critical to understand how immigration enforcement impacts their labor supply. We first propose a conceptual model of the impact of immigration enforcement on the market for home-based long-term care. Then, using data from the American Community Survey, we examine the effect of enforcement on the number of home care workers in a local area. We exploit temporal and geographic variation in the rollout of a federal enforcement policy, Secure Communities (SC), between 2008-2013, estimating difference-in-differences and event study models with time and location fixed effects to isolate the effect of the policy. We find that SC reduced the overall size of the workforce by 8.9%, with 70% of the effect driven by foreign-born workers. Then, using data from the Health & Retirement Study, we find large, negative externalities on older adults who need help at home. Consistent with our model’s predictions, these effects are concentrated among older adults on Medicaid, who experience a 20% reduction in receipt of formal home care post-SC.</p>
Working Papers	<p>“Adverse Selection and Network Design Under Regulated Plan Prices: Evidence from Medicaid” (NBER WP #30719) with Timothy J. Layton, Mark Shepard, and Jacob Wallace</p> <p>Health plans for the poor increasingly limit access to specialty hospitals. We investigate the role of adverse selection in generating this equilibrium among private plans in Medicaid. Studying a network change, we find that covering a top cancer hospital causes severe adverse selection, increasing demand for a plan by 50% among enrollees with cancer versus no impact for others. Medicaid’s fixed insurer payments make offsetting this selection, and the contract distortions it induces, challenging, requiring either infeasibly high payment rates or near-perfect risk adjustment. By contrast, a small explicit bonus for covering the hospital is sufficient to make coverage profitable.</p>
Papers in Progress	<p>“Medicaid Spending on Home- and Community-Based Services and the Economic Status of Home Care Workers” with Katherine Miller, Pilar Gonalons-Pons, Norma B. Coe, Allison K. Hoffman, and Katherine Rohde</p> <p>“Adverse Selection and Access to Specialty Care in Medicaid” (<i>solo-authored</i>)</p>
