		Professor David Cutler Department of Economics Harvard University dcutler@harvard.edu
Fellowships & Awards	National Bureau of Economic Research, Fellowship in Aging and Health Economics, 2019-2021 Harvard University, Merit/Term-Time Research Fellowship, 2019-2020 (<i>declined</i>) Harvard University, Certificate of Distinction in Teaching, 2018 Harvard University, Summer Predissertation Fellowship, 2017 National Institutes of Mental Health, Traineeship, 2015-2018	
Research	Harvard Medical School, Research Assistant for Professor Timothy Layton, 2017-2021 Harvard Medical School, Research Assistant for Professors Thomas McGuire, Michael McWilliams, and Timothy Layton, 2016 The Children’s Hospital of Philadelphia, PolicyLab, Research Associate, 2012-2015 The Children’s Hospital of Philadelphia, The National Children’s Study, Data Analyst, 2010-2012 The Pennsylvania State University, Research Assistant for Professor David Shapiro, 2008-2009	
Teaching	Harvard College, “Why is There No Cure for Health Care?” (Undergraduate Course), Teaching Fellow for Professor David Cutler, 2018 Harvard University, Core Course in Health Policy (PhD-Level Course), Teaching Fellow for Professor Joseph Newhouse, 2017-2018	
Other Employment	Greylock McKinnon Associates, Consultant, 2019 City of New Orleans, Mayor’s Office of Youth and Families, Field Project, 2019 Greylock McKinnon Associates, Graduate Summer Intern, 2017	

Job Market Paper **“Immigration Enforcement, the Home Care Workforce, and Access to Long-Term Care: Evidence from Secure Communities”** with Rachel M. Werner

Most Americans who turn 65 will eventually need long-term care, with those who remain at home relying on help from unpaid informal caregivers or paid home care workers. Since nearly one-third of home care workers are immigrants, it is critical to understand how escalating immigration enforcement in recent decades has impacted this workforce. To examine this question, we exploit geographic variation in the rollout of a federal enforcement policy, Secure Communities (SC), between 2008-2013. We first propose a two-market model for home care, with home care agencies supplying care to both Medicaid-insured and private-pay patients, and we predict that home care agencies will respond to a SC-induced increase in labor costs by restricting supply to Medicaid enrollees. Then, we use data from the American Community Survey and the Health & Retirement Study to examine the effect of SC on home care workers' labor market outcomes and older adults' home care utilization. We find that SC led to a 7.5% reduction in the number of home care workers per capita, with 70% of the effect driven by reductions in the supply of foreign-born workers.

Working Papers **“Adverse Selection and Network Design Under Regulated Plan Prices: Evidence from Medicaid”** (NBER WP #30719) with Timothy J. Layton, Mark Shepard, and Jacob Wallace

Health plans for the poor increasingly limit access to specialty hospitals. We investigate the role of adverse selection in generating this equilibrium among private plans in Medicaid. Studying a network change, we find that covering a top cancer hospital causes severe adverse selection, increasing demand for a plan by 50% among enrollees with cancer versus no impact for others. Medicaid's fixed insurer payments make offsetting this selection, and the contract distortions it induces, challenging, requiring either infeasibly high payment rates or near-perfect risk adjustment. By contrast, a small explicit bonus for covering the hospital is sufficient to make coverage profitable.
